

## Decimals and fractions

Decompose the decimal numbers into whole numbers, tenths, and hundredths, written as fractions

$$8,52 = \quad + \text{————} + \text{————}$$

$$6,56 = \quad + \text{————} + \text{————}$$

$$5,68 = \quad + \text{————} + \text{————}$$

$$5,19 = \quad + \text{————} + \text{————}$$

$$8,28 = \quad + \text{————} + \text{————}$$

$$7,36 = \quad + \text{————} + \text{————}$$
