

Adding Fractions

Correctly place the yellow multiplication bubbles to create two fractions with the same denominator.

$\frac{11}{16} + \frac{1}{2}$

x8 x8

Question marks are placed in dashed circles around the numerators and denominators of both fractions.

$\frac{5}{14} + \frac{1}{2}$

x7 x7

Question marks are placed in dashed circles around the numerators and denominators of both fractions.

$\frac{8}{12} + \frac{2}{3}$

x4 x4

Question marks are placed in dashed circles around the numerators and denominators of both fractions.

$\frac{1}{2} + \frac{4}{16}$

x8 x8

Question marks are placed in dashed circles around the numerators and denominators of both fractions.

$\frac{2}{3} + \frac{5}{6}$

x2 x2

Question marks are placed in dashed circles around the numerators and denominators of both fractions.

$\frac{3}{9} + \frac{2}{3}$

x3 x3

Question marks are placed in dashed circles around the numerators and denominators of both fractions.
