Adding Fractions

Find the missing numerators to solve the problem.

$$\frac{1}{2} + \frac{6}{8} = \frac{}{8} + \frac{}{8}$$

$$= \frac{}{8}$$

$$\frac{2}{3} + \frac{8}{9} = \frac{}{9} + \frac{}{9}$$

$$= \frac{}{9}$$

$$\frac{1}{2} + \frac{3}{6} = \frac{}{6} + \frac{}{6}$$

$$= \frac{}{6}$$

$$\frac{6}{9} + \frac{2}{3} = \frac{}{9} + \frac{}{9}$$

$$= \frac{}{9}$$

$$\frac{5}{6} + \frac{2}{3} = \frac{}{6} + \frac{}{6}$$

$$= \frac{}{6}$$

$$\frac{1}{3} + \frac{4}{6} = \frac{}{6} + \frac{}{6}$$

$$= \frac{}{6}$$
