

Multiplying Fractions

Solve the problem!

$$\frac{5}{2} \times \frac{5}{4} \times \frac{3}{1} = \text{---}$$

$$\frac{2}{5} \times \frac{6}{5} \times \frac{3}{2} = \text{---}$$

$$\frac{9}{5} \times \frac{4}{3} \times \frac{2}{5} = \text{---}$$

$$\frac{1}{5} \times \frac{7}{5} \times \frac{2}{1} = \text{---}$$

$$\frac{6}{1} \times \frac{2}{8} \times \frac{4}{2} = \text{---}$$

$$\frac{7}{1} \times \frac{6}{7} \times \frac{1}{3} = \text{---}$$

$$\frac{4}{6} \times \frac{3}{1} \times \frac{5}{3} = \text{---}$$

$$\frac{2}{8} \times \frac{6}{1} \times \frac{2}{1} = \text{---}$$

$$\frac{5}{7} \times \frac{1}{2} \times \frac{4}{3} = \text{---}$$

$$\frac{5}{3} \times \frac{2}{5} \times \frac{3}{4} = \text{---}$$

$$\frac{1}{9} \times \frac{5}{1} \times \frac{2}{4} = \text{---}$$

$$\frac{6}{1} \times \frac{5}{2} \times \frac{2}{3} = \text{---}$$

$$\frac{6}{5} \times \frac{5}{2} \times \frac{2}{4} = \text{---}$$

$$\frac{9}{6} \times \frac{5}{3} \times \frac{1}{2} = \text{---}$$

$$\frac{4}{2} \times \frac{2}{4} \times \frac{4}{7} = \text{---}$$

$$\frac{6}{4} \times \frac{3}{2} \times \frac{1}{5} = \text{---}$$
