

# Quadrilaterals

Write the name of the shape being described under each description

I am quadrilateral ABCD. All four of my sides are the same length. I don't have any right angles.

I am a shape with four sides, each one with a different length. Two of my sides are parallel to each other.

I am a shape with four sides. My opposite sides are parallel and the same length, but my four sides aren't of the same length. I don't have any right angles.

I am quadrilateral ABCD. My sides  $\overline{AB}$  and  $\overline{DC}$  are parallel but not the same length. My sides  $\overline{AD}$  and  $\overline{BC}$  are not the same length. I have two right angles.

I am quadrilateral ABCD. My sides  $\overline{AB}$  and  $\overline{DC}$  are parallel but not of the same length. My sides  $\overline{AD}$  and  $\overline{BC}$  are the same length.

I am quadrilateral ABCD. My sides  $\overline{AD}$  and  $\overline{BC}$  are parallel. My sides  $\overline{AB}$  and  $\overline{DC}$  are parallel. My sides  $\overline{AB}$  and  $\overline{BC}$  are equal. I have four right angles.
