Produit de fractions

Complète le calcul puis calcule le résultat de cette opération.

$\dfrac{1}{5} \times \dfrac{4}{5} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{3}{4} \times \dfrac{5}{6} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{3}{4} \times \dfrac{1}{2} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{2}{9} \times \dfrac{3}{8} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{1}{3} \times \dfrac{2}{5} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{5}{8} \times \dfrac{6}{8} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{1}{8} \times \dfrac{1}{2} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{5}{8} \times \dfrac{4}{8} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{2}{4} \times \dfrac{2}{8} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{1}{2} \times \dfrac{2}{7} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{1}{8} \times \dfrac{3}{5} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$

$\dfrac{3}{6} \times \dfrac{3}{6} = \dfrac{\square \times \square}{\square \times \square} = \underline{\qquad}$
