

Volume du cube et du pavé

Calcule le volume de chaque cube.

$$V = a^3$$

$$V = a \times a \times a$$

$$a = 6 \text{ cm}$$

$$V = \square \times \square \times \square$$

$$V = \square \text{ cm}^3$$

$$V = a^3$$

$$V = a \times a \times a$$

$$a = 9 \text{ cm}$$

$$V = \square \times \square \times \square$$

$$V = \square \text{ cm}^3$$

$$V = a^3$$

$$V = a \times a \times a$$

$$a = 8 \text{ cm}$$

$$V = \square \times \square \times \square$$

$$V = \square \text{ cm}^3$$

$$V = a^3$$

$$V = a \times a \times a$$

$$a = 5 \text{ cm}$$

$$V = \square \times \square \times \square$$

$$V = \square \text{ cm}^3$$
